It is twenty-one years since the adoption of World Heritage cultural landscape categories and ten years since Peter Fowler’s analysis of cultural landscapes in the World Heritage List following ten years of practice set in the framework of the Global Strategy. It is timely, therefore, to look at where we have come from and where we might be heading, or think we should be heading. It is particularly relevant to understand how many landscapes worldwide face major management challenges when seen through the lens of whose values are represented in cultural landscapes, questions of indigenous and local community values and considerations of human rights, and what are or should be management priorities.

Emeritus Professor Ken Taylor has degrees in Geography, Town Planning and Landscape Architecture. Until 2001 he was Professor of Landscape Architecture and Co-Director of the Cultural Heritage Research Centre, University of Canberra. He has had a research interest in cultural landscapes since the mid-1980s and published nationally and internationally on meanings, values and cultural landscape conservation. He has been a consultant to UNESCO, ICOMOS, and ICCROM. He is also currently a Visiting Professor at Silpakorn University, Bangkok, where he teaches on the International Program in Architectural Heritage Management and Tourism and supervises doctoral students. He has also undertaken work and given lectures/conference papers in Indonesia, India, China, Cambodia, Myanmar, Canada, UK, France and USA, including papers on Canberra, and is internationally known for his work.

He is a Board Member of the Landscape Research Group and Associate Editor Asia-Pacific for the international journal Landscape Research. He is Chair of the ACT Place Names Committee, Member of the ACT Historic Places Management Committee and Chair of the History Heritage Working Group for Centenary of Canberra (ACT Chief Minister’s Department). He is a Member of Board of AusHeritage, corresponding Member ICOMOS International Scientific Committee on Cultural Landscapes and was a member of the Expert Advisory Panel on Wind Farms and Landscape Values, National Assessment Methodology Project 2006-2007.
